PROFILE

Computer Science and Industrial Security graduate (Cum Laude), pursuing a Master of IT at Adelaide University with a Distinction average. Former Deloitte Korea consultant who reviewed system controls and security for ISMS and SOC certification. Currently building software engineering skills through team projects spanning a Python/NumPy library and a hackathon mobile app.

EDUCATION

Master of Information Technology (Enterprise Management), Adelaide University *Jul 2025 – Present*

- Maintaining a Distinction average across all completed coursework (GPA 6.07 / 7.0)

B. Industrial Security / B. Engineering (Computer Science), Chung-Ang University *Mar 2019 – Aug 2023*

- Graduated Cum Laude (GPA 3.92 / 4.50)

PROJECTS

UCompass - Campus Community Map App | CS Club Hackathon, Adelaide University, 2026

- Led project management and designed the UI/UX in Figma for a map-based student community app, delivering a working MVP within 33 hours
- Tested the live demo end to end to identify errors before submission

NumCompute - Scientific Computing Toolkit | AI Programming course, Adelaide University, 2026

- Co-developed a lightweight scientific computing library built from scratch using only Python and NumPy, with 10 modules and a consistent fit / transform / predict API
- Implemented the rank and sort_search modules (sorting, top-k, quickselect, binary search, ranking, percentiles) with documented time and space complexity; wrote pytest unit tests and reviewed teammates' code

AI Smart Glass for Construction Site Gauge Data | Bachelor's Capstone, Chung-Ang University, 2020

- Awarded Merit Prize for a team-built smart-glasses prototype for construction site gauge data
- Set up the Raspberry Pi and camera module, and developed image recognition using Teachable Machine (gauge type) and OpenCV (digit reading)
- Built the front end of a Django dashboard for inspection tracking, graphs and CSV export
- Rebuilding the system as a solo side project to connect the components end to end

PROFESSIONAL EXPERIENCE

Consultant, Deloitte Korea *Feb 2023 – Apr 2024*

- ISMS (Information Security Management System) Certification Support (KGC, GS Caltex): conducted compliance assessments of personal information flows, security equipment, information systems, and risk; reviewed third-party vendors; and performed gap analysis on the Personal Information Protection Act
- SOC (System and Organization Controls) Certification (Naver): reviewed audit evidence and prepared working papers across data protection, asset management, governance, and information security control areas

TECHNICAL SKILLS

- Languages & Data: Python, Java, C++, T-SQL, SQL Server, MongoDB
- Tools: NumPy, pytest, Django, OpenCV, Raspberry Pi, Figma, SAP S/4HANA

CERTIFICATIONS

CPPG (Certified Privacy Protection General) | SQLD (SQL Developer) | ISE (Industrial Security Expert) | Engineer Information Processing | SOC Essentials
